# OVERVIEW OF THE GRE

The GRE General Test is a computer-delivered test that features question types that closely reflect the kind of thinking you'll do and the skills you need to succeed in today's demanding graduate school programs, including business and law. The test-taker-friendly design lets you skip questions within a section, revisit and rework your answers (mark and review feature), and have the flexibility to choose which questions within a section you want to answer first. Get a look at the structure of the GRE General Test.

The GRE General Test measures your verbal reasoning, quantitative reasoning, critical thinking, and analytical writing skills, skills that have been developed over a long period of time and are not related to a specific field of study but are important for all. Here's a look at the content covered in the three test sections: Analytical Writing, Verbal Reasoning, and Quantitative Reasoning.

## TEST STRUCTURE

The overall testing time for the GRE General test is 1 hour and 58 minutes, with no break.

| Measure | Number of Questions | Allotted Time |
|---|---|---|
| **Analytical Writing Assessment** (One section) | One "Analyze an Issue" task | 30 minutes |
| **Verbal Reasoning** (Two sections) | Section 1: 12 questions Section 2: 15 questions | Section 1: 18 minutes Section 2: 23 minutes |
| **Quantitative Reasoning** (Two sections) | Section 1: 12 questions Section 2: 15 questions | Section 1: 21 minutes Section 2: 26 minutes |
| **Total Time** | | 1 hour 58 minutes |

## SCORING PATTERN

The Analytical Writing section is scored on a scale of 0-6 in half-point increment.
The Verbal Reasoning section is scored on a scale of 130-170 in 1-point increment.
The Quantitative Reasoning section is scored on a scale of 130-170 in 1-point increment.

The Verbal Reasoning and Quantitative Reasoning sections are section-level adaptive. The first operational section of each measure (i.e., Verbal and Quantitative) is of average difficulty. The difficulty level of the second section of each of the measures depends on your overall performance on the first section of that measure. For example, if for the Quantitative Reasoning measure, you do very well in the first section, the second section of the Quantitative Reasoning measure will be at a higher level of difficulty. The scoring for the Verbal Reasoning and Quantitative Reasoning measures takes into consideration the total number of questions answered correctly across the two sections, as well as the difficulty level of the sections.

## SPECIFIC FEATURES OF THE TEST

The advanced adaptive design of the GRE General Test allows you to move forward and backwards throughout an entire section freely. Specific features include:

- You can preview and review capabilities within a section.

- The test has 'Mark' and 'Review' features to tag questions, so you can skip them and return later if you have time remaining in the section.

- You are allowed to change/edit answers within a section.

- An on-screen calculator for the Quantitative Reasoning section is available.
